★ TAX CALCULATOR ★

OFFICIAL INSTRUCTION BOOKLET — VB.NET / WINDOWS FORMS EDITION

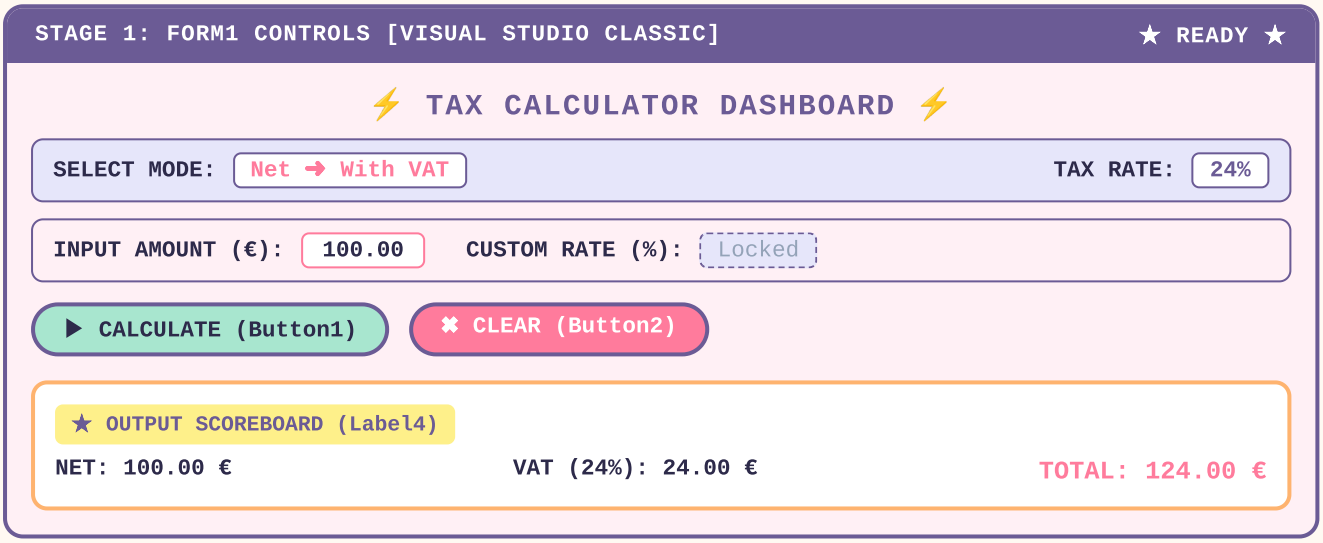

PLAYER 1
[GK] PORTFOLIO

1. GAME OVERVIEW & SYSTEM SPECS

Welcome to **Tax Calculator (TaxCalc)**! This mini software application is built using **Visual Basic .NET** and Visual Studio 2022. Designed with an easy-to-use interface, it allows players to seamlessly compute VAT (Net to With VAT & With VAT to Net) with precision and instant validation.

2. MAIN INTERFACE MAPPING

Take a look at your main dashboard control screen before starting:

★ KEY GAMEPLAY FEATURES:

- **RATES** Choose predefined tax presets (24%, 13%, 6%) or pick Custom Rate ("Other...").
- **SHIELD** Smart input validation blocks negative numbers and invalid percentage values.
- **RESET** Hit the Clear button to instantly wipe the board and start a new calculation.

3. CALCULATION MODES & FORMULAS

MODE A: Net ➜ With VAT

Computes the added tax on top of your base score amount.

VAT Formula:	`Net * (Rate / 100)`
Final Total:	`Net + VAT`

MODE B: With VAT ➜ Net

Extracts the original net amount from a gross total.

Net Formula:	`Total / (1 + Rate/100)`
VAT Amount:	`Total - Net`

4. HOW TO LAUNCH THE GAME

1. Load the project solution file (`TaxCalc.sln`) in **Visual Studio 2022**.
2. Build the solution using `Ctrl + Shift + B`.
3. Press `F5` or click **Start** to launch your calculator!
